SYNTHETIC WORKSHOP CHECKLIST

This invented form tests two-column grid extraction. Row labels and their values should stay paired. It is a parser fixture, not a completed record or a document taken from another source.

Appendix B

CHECK	EXPECTED RESULT
Tray colour	Amber
Counter shape	Triangle
Storage location	Upper shelf
Checked by: [name]	Reviewed by: [name]

End of synthetic form. The table deliberately contains distinct labels and values so a flattened or reordered extraction is observable.
